

COOPERATIVE ECONOMIC INSECT SURVEY REPORT
Glenn A. Salsbury, Survey Entomologist

Report 6, Volume 52
May 18, 2005

EUROPEAN ELM BARK BEETLE: A large flight of beetles was noted a week ago.

WHEAT STEM MAGGOT: Found infesting corn plants in areas within fields. Three to four percent of the plants were infested in small areas.

HESSIAN FLY: No problems have been reported.

ARMYWORM: No problems have been reported in wheat. Only trace numbers were found in a few fields.

CEREAL LEAF BEETLE: None have been found during surveys which began last week.

WHEATHEAD ARMYWORM: Only trace numbers were found during recent surveys.

ASH/LILAC BORER: Moth flight is continuing and is particularly heavy at the present time.
